CATALOG
OF CONCRETE FURNITURE

www.crous.eu

Welcome

At Crous Expert, the choice of concrete as the main material responds to our philosophy: to create urban furniture that lasts, is sustainable, and withstands daily use without compromising design.

We invite you to discover each of our solutions in this catalog, designed to transform urban spaces into more comfortable, safe, and durable places.

Content

At Crous Expert, we specialize in high-quality urban equipment, designing robust, functional solutions that are aesthetically integrated into the public environment. We are pleased to introduce our exclusive catalog of urban furniture in concrete, a collection aimed at bringing durability, design, and comfort to urban spaces. Below, we invite you to discover each of the elements that are part of our offering, explaining their usefulness and value in the public space:

- Benches and chairs:Designed to provide rest and comfort to citizens, our concrete benches and chairs combine structural strength with modern designs. Perfect for parks, avenues, squares, and waiting areas, they withstand continuous use, adverse weather conditions, and vandalism.
- Tables:Our urban concrete tables are designed to promote socializing and outdoor leisure. Whether for a meal, a casual gathering, or a board game in the park, their sturdiness ensures a long lifespan and minimal maintenance.
- Trash Bins: Concrete trash bins are essential elements for maintaining cleanliness in urban areas. They provide stability, capacity, and security, reducing the risk of tipping over or being vandalized. Their design can adapt to the environment without losing functionality.
- Planters: In addition to beautifying the surroundings, our planters help define spaces and channel pedestrian traffic. Their weight and durability allow them to hold large plants, integrating nature into urban settings in a harmonious manner.
- Fountains: Urban fountains made of concrete provide aesthetic and functional value. They can serve both as a hydration point and a decorative element, creating a more pleasant experience for users of public spaces.
- Bike Racks:Robust and well-designed, our concrete bike racks promote sustainable mobility by offering a safe and stable solution for parking bicycles. Their weight prevents them from being moved or vandalized.
- Bus PlatformsDesigned to improve accessibility, our concrete bus platforms create safe and sturdy raised areas that facilitate access for people with reduced mobility, optimizing the functionality of public transport.
- Bollards: Functional and safe, concrete bollards are used to regulate traffic, protect pedestrian areas, and restrict vehicle access in sensitive areas. Their deterrent presence does not prevent their aesthetic integration into the urban landscape.

At Crous Expert, we are a company specialized in urban equipment, committed to designing and producing high-quality, durable, and functional solutions for public spaces. We are proud to introduce our concrete product catalog, a carefully curated selection of urban furniture made entirely from premium-grade concrete, ideal for modern cities, parks, transit areas, and communal spaces.

Why Concrete?

Concrete is a robust, weather-resistant, and low-maintenance material, making it one of the most reliable choices for public infrastructure. Its high structural integrity, vandal-resistance, and design flexibility allow us to create elements that not only serve their function but also enhance the urban environment with aesthetic value and permanence.

CUB I 50

CONCRETE

Concrete structure sidewalk

Outdoor bench Cube made of concrete with a stripped and waterproof finish. Granitic grey color with a smooth appearance.
Other colors available upon request.
Extremely resistant to atmospheric changes in humidity, temperature, and UV light, so the color of this material remains stable over time.
No maintenance required. Secured by its own weight. It is antiseptic.
Repels stains, fungi, and bacteria. It has PEFC certification.
Dimensions: 50 x 50 x 45 cm. Weight: 285 kg.

Ref	Length	Width	Seat Height	Total Height
MUB013050	50cm	50cm	45cm	45cm

***On request**

CUB I 100

CONCRETE

Concrete structure bench

Outdoor bench Cube made of concrete with a stripped and waterproof finish. Granite gray color with a smooth appearance.
Other colors available upon request.
Extremely resistant to atmospheric changes in humidity, temperature, and UV light, so the color of this material remains stable over time.
No maintenance required. Secured by its own weight. It is antiseptic.
Repels stains, mold, and bacteria. Comes with PEFC certification.
Dimensions: 100 x 50 x 45 cm. Weight: 525 kg.

Ref	Length	Width	Seat Height	Total Height

***On request**

CUB I 120

CONCRETE

Concrete structure bench

Outdoor bench Cube made of concrete with a stripped and water-repellent finish. Granite gray color with a smooth appearance.
Other colors available upon request.
Extremely resistant to atmospheric changes in humidity, temperature, and UV light, ensuring that the color of this material remains stable over time.
No maintenance required. Fixed by its own weight. It is antiseptic. Repels stains, fungi, and bacteria. Comes with a PEFC certificate.
Dimensions: 120 x 50 x 45 cm. Weight: 625 kg.

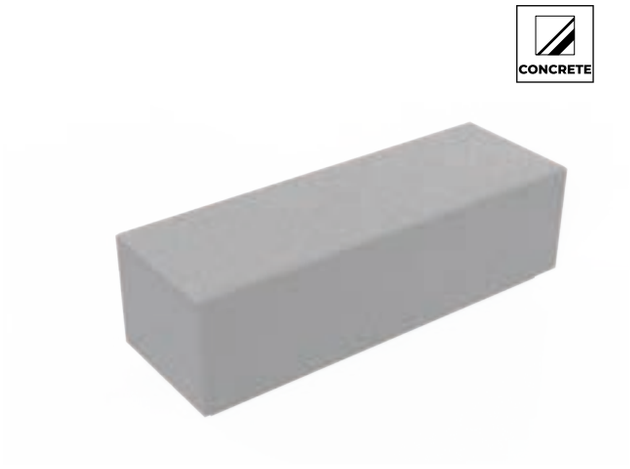

Ref	Lenght	Width	Seat Height	Total Height
MUB013120	120cm	50cm	45cm	45cm

***On request**

CUB I 150

Concrete structure bench

Structure made of smooth-looking prefabricated concrete.
Fixation to the ground by support from its own weight.
Available in various sizes, colors, and finishes.
Weight: 580 kg.

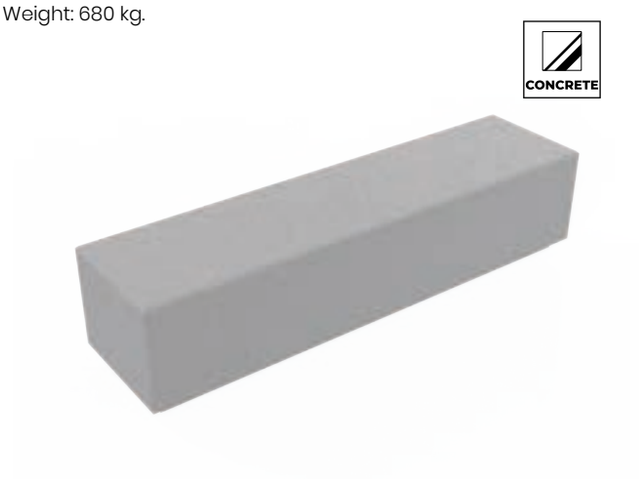

Ref	Length	Width	Height
MUB013150	150cm	50cm	45cm

***On request**

CUB I 200

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by support from its own weight.
Available in various sizes, colors, and finishes.
Weight: 680 kg.

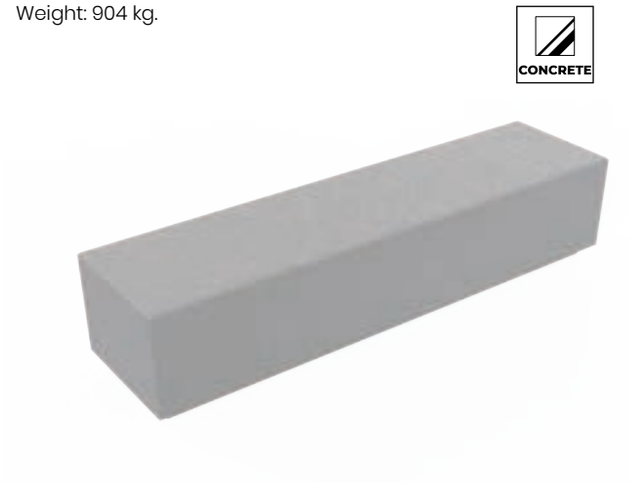

Ref	Length	Width	Height
MUB013200	200cm	50cm	45cm

***On request**

CUB I 240

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by support from its own weight.
Available in various sizes, colors, and finishes.
Weight: 904 kg.

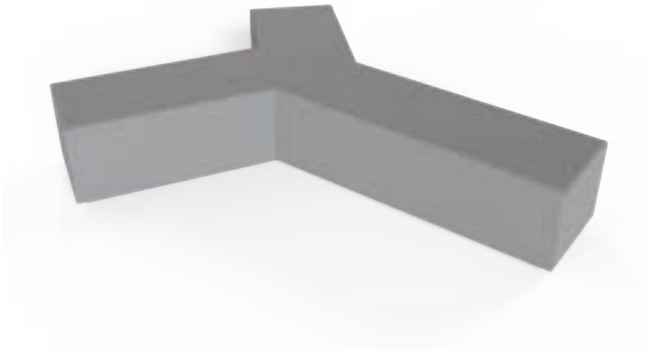

Ref	Length	Width	Height
MUB013240	240cm	50cm	45cm

***On request**

CUB Y

Concrete structure bench

Structure using prefabricated concrete with a smooth appearance. Fixation to the ground by support through its own weight.

Ref	Length	Width	Height
MUB013245Y	245cm	50cm	45cm

***On request**

CONCRETE BENCHES

CROUS

Concrete structure bench

Structure made of smooth-looking prefabricated concrete.
Fixing with epoxy resin.
Available in various sizes, colors, and finishes.
Weight: 485 kg.

CONCRETE

Ref	Length	Width	Height
MUB031	190cm	51cm	47cm

***On request**

CROUS 2M

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by support from its own weight.
Available in various sizes, colors, and finishes.
Weight: 790 kg.

CONCRETE

Ref	Length	Width	Height
MUB0332	200cm	80cm	45cm

***On request**

CROUS 4M

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by resting on its own weight.
Available in various sizes, colors, and finishes.
Weight: 1613 kg.

CONCRETE

Ref	Length	Width	Height
MUB0334	400cm	80cm	45cm

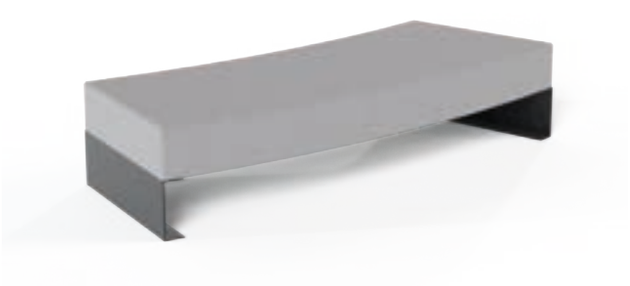

***On request**

CROUS R

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by support from its own weight.
Available in various sizes, colors, and finishes.
Weight: 800 kg.

CONCRETE

Ref	Length	Width	Height
MUB0336	215,5cm	80cm	45cm

***On request**

ROD

Concrete structure bench

Structure made of smooth-looking precast concrete. Fixation to the ground by resting on its own weight.
Available in various sizes, colors, and finishes.
Weight: 600 kg.

Ref	Length	Width	Height
MUB034100	Ø100cm	Ø100cm	45cm

***On request**

ROD 140

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by support from its own weight.
Available in various sizes, colors, and finishes.
Weight: 1050 kg.

Ref	Length	Width	Height
MUB034140	Ø140cm	Ø140cm	45cm

***On request**

ROD 180

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by support from its own weight.
Available in various sizes, colors, and finishes.
Weight: 1650 kg.

Ref	Length	Width	Height
MUB034180	Ø180cm	Ø180cm	45cm

***On request**

EXPERT B 50

Concrete structure bench

Structure made of prefabricated concrete with a smooth appearance. Fixed to the ground by its own weight or epoxy resin.
Available in various sizes, colors, and finishes.
Weight: 426 kg.

Ref	Length	Width	Height
MUB035050	200cm	50cm	45cm

***On request**

EXPERT T-77

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by support from its own weight.
Available in various sizes, colors, and finishes.
Weight: 930 kg.

Ref	Length	Width	Seat Height	Total height
MUB035077	210cm	90cm	95cm	95cm

***On request**

EXPERT B 120

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground using support or epoxy resin.
Available in various sizes, colors, and finishes.
Weight: 250 kg.

Ref	Length	Width	Seat Height	Total height
MUB036120	120cm	60cm	45cm	45cm

***On request**

EXPERT B 200

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixation to the ground using support or epoxy resin.
Available in various sizes, colors, and finishes.
Weight: 346 kg.

Ref	Length	Width	Seat Height	Total height
MUB036200	200cm	60cm	45cm	45cm

***On request**

CAD

Concrete structure chair

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by its own weight or metal rods.
Available in various sizes, colors, and finishes.
Weight: 167kg.

Ref	Length	Width	Seat Height	Total height
MUB037050	50cm	59cm	44cm	85cm

***On request**

CAD KIDS

Concrete structure little chair

Structure made of smooth-looking prefabricated concrete. Fixation to the ground by its own weight or metal rods.
Available in various sizes, colors, and finishes.
Weight: 55 kg.

Ref	Length	Width	Seat Height	Total height
MUB037035	35cm	41cm	31cm	60cm

***On request**

CADAS

Concrete structure bench

Structure made of smooth-looking prefabricated concrete. Fixed to the ground by screwing with concrete.
Available in various sizes, colors, and finishes.
Weight: 430 kg.

Ref	Length	Width	Seat Height	Total height
MUB037180	180cm	55cm	44cm	85cm

***On request**

MES B

Mes B concrete picnic table

Reinforced concrete picnic table Petra. with a stripped, smooth, and anti-graffiti finish. Color white or gray.
Anchoring to the ground.
Weight: 376 kg

Ref	Length	Width	Total height
MUB038	100cm	100cm	65cm

***On Request**

MES D

Mes D concrete picnic table

Reinforced concrete picnic table Petra. with a stripped, smooth, and anti-graffiti finish. Color white or gray.
Anchoring to the ground.
Weight: 376 kg

Ref	Length	Width	Total height
MUB038	180cm	184cm	76,5cm

***On Request**

MES E

Mes E concrete picnic table

Reinforced concrete picnic table, with a stripped, smooth, and anti-graffiti finish. Available in white or gray. Secured to the ground.
Weight: approximately 1086 kg.

Ref	Length	Width	Total height
MUB038	232 cm	95 cm	80 cm

***On Request**

CUB 100 PLANTER

Cub 100 concrete planter

Concrete planter with a weathered and water-repellent finish. Stabilization is supported by its own weight, no anchoring required for installation. Available in various colors. Drainage occurs through the holes drilled in its bottom that go through the base. Capacity: 137 liters.

Ref	Length	Width	Total height
MUJ008100	100cm	50cm	45cm

***On Request**

CUB 200 PLANTER

Cub 200 concrete planter

Concrete planter with a weathered and water-repellent finish. Stabilization is supported by its own weight, no anchoring required for installation. Available in various colors. Drainage occurs through the holes drilled in its bottom that go through the base.
Capacity: 450 liters.

Ref	Length	Width	Total height
MUJ008200	200cm	50cm	45cm

***On Request**

EVO PLANTER

EVO concrete planter

Concrete planter with a distressed and waterproof finish.Supports its own weight for fixation, no anchoring required for installation.Drainage occurs through the holes in the bottom that go through the plinth.
Capacity: 275 liters.

Ref	Length	Width	Total height
MUJ012130	Ø130cm	Ø130cm	50cm

***On Request**

CIRCULAR BIG PLANTER

CONCRETE

Circular Big Planter

Concrete planter with a weathered and water-repellent finish. Stabilization is supported by its own weight, no anchoring required for installation. Available in various colors. Drainage occurs through the holes drilled in its bottom that go through the base.
Capacity: 485 liters.

Ref	Length	Width	Total height
MUJ009110	Ø110cm	Ø110cm	90cm

***On Request**

CIRCULAR MEDIUM PLANTER

CONCRETE

Circular Medium Planter

Planter with a weathered and water-repellent finish. Stabilization is supported by its own weight, no anchoring required for installation. Available in various colors. Drainage occurs through the holes drilled in its bottom that go through the base.
Capacity: 271 liters.

Ref	Length	Width	Total height
MUJ009091	Ø90cm	Ø90cm	63cm

***On Request**

CIRCULAR SMALL PLANTER

CONCRETE

Circular Small Planter

Concrete planter with a weathered and water-repellent finish. Stabilization is supported by its own weight, no anchoring required for installation. Available in various colors. Drainage occurs through the holes drilled in its bottom that go through the base.
Capacity: 228 liters.

Ref	Length	Width	Total height
MUJ009090	Ø90cm	Ø90cm	52cm

***On Request**

CROUS 70 PLANTER

Crous 70 Planter

Concrete planter with a distressed and waterproof finish.Supports its own weight, no anchoring is required for its installation.Drainage occurs through the holes in the bottom that go through the plinth.
Capacity: 209 liters.

CONCRETE

Ref	Length	Width	Total height
MUJ013070	70 cm	70 cm	50 cm

***On Request**

CROUS 155 PLANTER

Crous 155 Planter

Concrete planter with a distressed and waterproof finish.Supports its own weight for fixation, no anchoring required for installation.
Drainage occurs through the holes in the bottom that go through the plinth.
Capacity: 460 liters.

CONCRETE

Ref	Length	Width	Total height
MUJ013155	155 cm	70 cm	50 cm

***On Request**

CROUS MUR PLANTER

Crous Mur Planter

Concrete planter with a distressed and waterproof finish.Supports its own weight, no anchoring is required for its installation.Drainage occurs through the holes in the bottom that go through the plinth.
Capacity: 217 liters.

CONCRETE

Ref	Length	Width	Total height
MUJ013101	98 cm	38 cm	75 cm

***On Request**

CROUS 100 PLANTER

Crous 100 Planter

Concrete planter with a distressed and waterproof finish.Supports its own weight for stability, no anchoring required for installation.
Drainage occurs through the holes in the bottom that go through the plinth.Capacity: 97 liters.

CONCRETE

MUJ013100	98 cm	38 cm	45 cm

***On Request**

SQUARE JQ-60 PLANTER

Jardinera de hormigón Square JQ-60

Jardinera de hormigón Petra 1 con acabado decapado e hidrofugado

Fijación apoyado por su propio peso, no precisa de anclaje para su instalación.

El drenaje se produce por los orificios practicados en su fondo que atraviesan el zócalo.

Capacidad: 155 litros.

Ref	Length	Width	Total height
MUJ010060	63 cm	63 cm	64 cm

***On Request**

SQUARE JQ-90 PLANTER

Jardinera de hormigón Square JQ-90

Jardinera de hormigón Petra 1 con acabado decapado e hidrofugado

Fijación apoyado por su propio peso, no precisa de anclaje para su instalación.

El drenaje se produce por los orificios practicados en su fondo que atraviesan el zócalo.

Capacidad: 438 litros.

Ref	Length	Width	Total height
MUJ010090	90 cm	90 cm	80 cm

***On Request**

SQUARE JQ-120 PLANTER

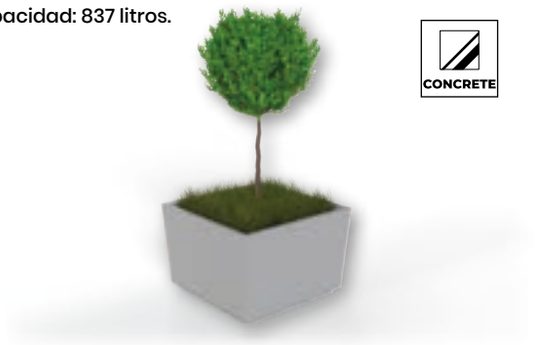

Jardinera de hormigón Square JQ-120

Jardinera de hormigón Petra 1 con acabado decapado e hidrofugado

Fijación apoyado por su propio peso, no precisa de anclaje para su instalación.

El drenaje se produce por los orificios practicados en su fondo que atraviesan el zócalo.

Capacidad: 837 litros.

Ref	Length	Width	Total height
MUJ010120	120 cm	120 cm	80 cm

***On Request**

SQUARE JRA-100 PLANTER

Jardinera de hormigón Square JRA-100

Jardinera de hormigón Petra 1 con acabado decapado e hidrofugado

Fijación apoyado por su propio peso, no precisa de anclaje para su instalación.

El drenaje se produce por los orificios practicados en su fondo que atraviesan el zócalo.

Capacidad: 360 litros.

Ref	Length	Width	Total height
MUJ011100	100	60 cm	93 cm

***On Request**

SQUARE JR 120 PLANTER

CONCRETE

Square JR 120 Planter

Jardinera de hormigón Petra 1 con acabado decapado e hidrofugado
Fijación apoyado por su propio peso, no precisa de anclaje para su instalación. Disponible en varios colores.
El drenaje se produce por los orificios practicados en su fondo que atraviesan el zócalo.
Capacidad: 265 litros

Ref	Length	Width	Total height
MUJ011120	120cm	60cm	60cm

***On Request**

CUB J-45 PLANTER

CONCRETE

Cub J-45 Planter

Jardinera de hormigón Petra 1 con acabado decapado e hidrofugado
Fijación apoyado por su propio peso, no precisa de anclaje para su instalación. Disponible en varios colores.
El drenaje se produce por los orificios practicados en su fondo que atraviesan el zócalo.
Capacidad: 158 litros

Ref	Length	Width	Total height
MUJ014045	120cm	60cm	45cm

***On Request**

CUB J-61 PLANTER

CONCRETE

Cub J-61 Planter

Jardinera de hormigón Petra 1 con acabado decapado e hidrofugado
Fijación apoyado por su propio peso, no precisa de anclaje para su instalación. Disponible en varios colores.
El drenaje se produce por los orificios practicados en su fondo que atraviesan el zócalo.
Capacidad: 240 litros
