MINI CONTAINER HOLDER

Prepare to integrate anti-extraction

ALT: 120'5 cm
(18 cm for recess)
WIDTH: 75 cm

Universal support for fixing R.S.U containers of 240 and 360 liters. It is an element that holds and prevents the containers from moving, either by the effect of the wind, or by the place where they are located, such as sloping streets or areas close to the road.
Chassis of the support made of galvanized tubular profiles of different sizes, embedded and fastened with mechanical fixings. It has a front arm anti-theft system. Front folding arm in galvanized round tube. The construction system of the support allows it to be disassembled by professionals and, if necessary, to be able to change the arm and be replaced by a new one, avoiding having to change the whole assembly, it facilitates repairs in case of replacement of any support element.

This arm can be disassembled, if necessary, by a larger one to hold the 1000 liter hinged lid containers, without having to change the entire support. It also makes repairs easier in case you have to replace the clamping arm with a new one. Very fast and simple assembly.

Installation: prepared to be embedded in concrete to the pavement, with anti-extraction system.

FOR CONTAINERS
from 240 lts – 360 lts

Ref.MUT079
